2019 SOUTHERN SOUTHEAST INSIDE SUBDISTRICT SABLEFISH FISHERY ANNOUNCEMENT

Douglas...The 2019 Southern Southeast Inside (SSEI) Subdistrict sablefish commercial annual harvest objective (AHO) is 590,349 round lb, a 2% increase from the 2018 AHO. Equal quota share (EQS) for each of the 22 permit holders will be 26,834 round pounds. The number of permits for this fishery decreased by 1 (C61C) for the 2019 season due to an interim use permit not being renewed by the Commercial Fisheries Entry Commission (CFEC) and will no longer be available. Each permit holder's 2019 EQS will be adjusted based on any legal overages or underages in 2018 and a personal quota share (PQS) will be assigned. The Alaska Department of Fish and Game (ADF&G) evaluates stock status and establishes the SSEI AHO using commercial fishery and survey catch per unit effort (CPUE) data, fishery and survey biological data (age, weight, length, and maturity), and stock status trends of sablefish populations in surrounding geographic areas.

For 2019, the SSEI AHO was raised 2% due to continued increases in the longline survey CPUE index, signs of continued recruitment in length and age class distributions in the survey and fishery, introduction of escape rings for pot gear to reduce harvest of immature individuals and increasing trends in sablefish biomass from adjacent areas including the Gulf of Alaska (GOA), British Columbia, Canada (BC), and Northern Southeast Inside (NSEI) Subdistrict. Sablefish in SSEI are estimated to have a 30% chance of moving out of SSEI into the GOA and BC after one year of occupancy and therefore trends in abundance observed in adjacent areas are likely mirrored in the SSEI stock. While the abundance of older individuals has declined in SSEI, recent large recruitment events suggest a projected increase in spawning stock biomass, though the overall magnitude of that increase is uncertain. These improvements prompted a cautionary increase of the 2019 SSEI AHO to allow for continued recovery of the stock and economic opportunity for permit holders and their local communities

The SSEI longline sablefish fishery will open 8:00 a.m., Saturday, June 1, 2019, for both the longline and pot fisheries. The SSEI sablefish season will close for both the longline and pot fisheries at 12:00 noon, Friday, November 15, 2019.

Legal Gear

Sablefish may be taken in the directed SSEI sablefish fishery only by longline and pots. CFEC limited entry C61C permits can use both longline and pot gear while C91C permits are restricted to the use of pot gear only. Groundfish pot gear requires individual tunnel eye openings with perimeters 36 inches or less and a sidewall containing an escapement opening equal to or exceeding 18 inches in length that must be laced, sewn, or secured together by a single length of untreated, 100 percent cotton twine, no larger than

30 thread of which may be knotted at each end only and must be parallel to and within six inches of the bottom of the pot [5 AAC 39.145 (1)]. Pots must have at least two circular escape rings, with a minimum inside diameter of four inches, installed on opposing vertical or sloping walls of the pot. King and Tanner crab pots as described in 5 AAC 34.050(2) and 5 AAC 35.050(2) may not be used to take groundfish.

Registration and Logbook Requirements

Fishermen must register prior to fishing [5 AAC 28.106 (b)] and keep a logbook during the fishery. Registration forms and logbooks will be available at ADF&G offices in Southeast Alaska beginning May 15, 2019. Completed logbook pages must be attached to the ADF&G copy of the fish ticket at the time of delivery. Confidential envelopes for logbook pages may be requested when registering.

Permit holders will receive a PQS tracking form at the time of registration. This form is used to record the total round weight landed for each delivery. Each permit holder must, upon request, provide the buyer with the total round weight of sablefish the permit holder has landed to date. The department requests that a copy of the completed PQS tracking form is included with the final fish ticket of the season for that permit.

Logbooks must include, by set, the date and time gear is set and retrieved, specific location of harvest by latitude and longitude in degrees and decimal minutes for start and ending positions, hook and pot spacing, amount of gear (number of hooks or pots), depth of set, estimated weight of the target and bycatch species retained or discarded. Indicate for each set if the target species was sablefish or halibut and if there was any lost gear [5 AAC 28.175 (a)].

Tagged Sablefish

Fishermen are requested to watch for tagged sablefish. Please record tag number(s) and attach tags directly to the logbook with the corresponding set information. All persons who return an ADF&G sablefish tag will receive a tag reward (i.e. T-shirt). Tag returns with valid recovery information (date of recovery and latitude and longitude) are entered into a random drawing for a cash prize.

Fish Ticket Requirements

Landed weights must be recorded on a fish ticket at the time of delivery. If a fisherman delivers fish in the round, the total round weight delivered must be recorded on the fish ticket. If a fisherman delivers dressed fish, the fish ticket must include the total landed dressed weight as well as the round weight equivalent, determined by using the standard 0.63 recovery rate. There is a two percent allowance for ice and slime when unrinsed whole iced sablefish are weighed. A fish ticket must be completed prior to the resumption of fishing and each permit holder must retain onboard their vessel, copies of all SSEI sablefish tickets from the current season as well as their updated PQS tracking form. When delivering fish out of state, a completed fish ticket must be submitted to ADF&G prior to transporting fish out of Alaska.

Possession and Landing Requirements

The holder of a CFEC permit or interim use permit for sablefish may not retain more sablefish in the directed fishery than the annual amount of sablefish EQS specified by the department [5 AAC 28.170 (g)]. However, if a permit holder's harvest exceeds the permit holder's EQS for that year, by not more than five percent, the department shall reduce the permit holder's EQS for the following year by the amount of the overage [5 AAC 28.170 (j)]. If a permit holder's harvest exceeds the permit holder's equal quota share by more than five percent, the proceeds from the sale of the overage in excess of five percent shall be surrendered to the state and the permit holder may be prosecuted under AS 16.05.723. A permit holder may not knowingly exceed a quota share or exceed the EQS in an amount greater than five percent as such actions may be prosecuted under AS 16.05.722 or AS 16.05.723 [5 AAC 28.170 (j)].

If a permit holder's harvest is less than the permit holder's EQS for that year, the department shall increase the permit holder's EQS only for the following year by the amount of the underage that does not exceed five percent of the EQS [5 AAC 28.170 (k)]. **For the 2019 SSEI sablefish fishery, five percent of the annual EQS equals 1,342 round pounds.**

Sablefish Live Market

A permit holder may possess live sablefish for delivery as live product except that, upon request of a local representative of the department or law enforcement, a permit holder must present sablefish for inspection and allow biological samples to be taken [5 AAC 28.170 (l)].

Bycatch Allowances for the SSEI Sablefish Fishery

Percentage indicates amount of bycatch that may be sold on a SSEI sablefish permit and is based on the round weight of sablefish and bycatch species or species group on board the vessel:

Species	Longline Gear	Pot Gear
Demersal Shelf Rockfish (DSR)	1%	0%
Shortraker & Roughey Rockfish	7% in aggregate	0%
Other rockfish & thornyheads	15% in aggregate	N/A
Thornyheads	N/A	5%
Lingcod	0%	0%
Pacific Cod	20%	20%
Spiny Dogfish	35%	20%
Other groundfish	20%	20%

CFEC permit holders fishing for groundfish or halibut in SSEI must retain, weigh, and report all rockfish taken [5 AAC 28.171 (f)]. This regulation does not apply to thornyhead rockfish. All rockfish in excess of allowable bycatch limits shall be reported as bycatch overage on the fish ticket. Any proceeds from the sale of excess rockfish shall be surrendered to the state.

A CFEC permit holder fishing for groundfish must retain all Pacific cod when the directed fishery for Pacific cod is open and up to the maximum retainable bycatch amount (20%) of Pacific cod when a directed fishery for Pacific cod is closed [5 AAC 28.070 (e)]. Pacific cod taken in excess of the bycatch limit in areas open to directed fishing for Pacific cod may be landed on a CFEC miscellaneous saltwater finfish permit designated for the gear that was used.

Prohibitions

A vessel or a person on board a vessel from which commercial, subsistence, or personal use longline fishing gear was used to take fish in the SSEI area during the 72-hour period immediately before the start of the commercial SSEI sablefish fishery, or from which that gear will be used during the 24-hour period immediately after the closure of the SSEI sablefish fishery, may not participate in the taking of sablefish in SSEI during that open sablefish fishing period [5 AAC 28.180 (a)]. The operator of a fishing vessel may not take sablefish in SSEI while sablefish from another area are onboard the vessel. Also, the operator of a vessel taking sablefish in SSEI shall unload and submit a completed fish ticket to the department before taking sablefish in another area [5 AAC 28.170 (a) and (b)].
